ECOLOGY, HEALTH AND SAFETY

REGULATION (EC) NO 1907/2006 - REACH

This product is an article as defined in article 3 of regulation (EC) No 1907/2006 (REACH). It contains no substances which are intended to be released from the article under normal or reasonably foreseeable conditions of use. A safety data sheet following article 31 of the same regulation is not needed to bring the product to the market, to transport or to use it. For safe use follow the instructions given in the product data sheet. Based on our current knowledge, this product does not contain SVHC (substances of very high concern) as listed in Annex XIV of the REACH regulation or on the candidate list published by the European Chemicals Agency in concentrations above 0,1 % (w/w).

APPLICATION INSTRUCTIONS

APPLICATION METHOD / TOOLS

Hole cleaning is an important part of all installations and has an essential effect on the performance of the anchorages.

The drill hole must be cleaned, starting from the bottom of the drill hole.

Fully extend the pump piston. Insert the flexible tube to the bottom of the drill hole. Push the piston back rapidly to blow out the dust from the drill hole. Repeat this procedure.

A combination of correct diameter brush and compressed air (compressor or Sika AnchorFix® Cleaning Pump) must be used to clean the drill holes.

Do not use other cleaning pump types. Sika AnchorFix® Cleaning Pump is designed to produce the correct volume of air for the different size drill holes.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the declared data for this product may vary from country to country. Please consult the local Product Data Sheet for the exact product data.
