PRODUCT DATA SHEET

Davco[®] Sanitized Tile & Grout Sealer

DESCRIPTION

A solvent-based sealer that helps protect against stains, soiling, discolouration and efflorescence

USES

- Suitable for interior and exterior applications.
- Commercial and domestic walls and floor grout joints.
- Only suitable for cement-based grouts.
- Can also be used over most unglazed porous ceramic tiles.

CHARACTERISTICS / ADVANTAGES

- Clear solution which cures to an invisible, water repellent coating
- Easy to apply
- Provides good protection from stains
- Prevents Efflorescence

PRODUCT INFORMATION

Packaging	500ml Metal can
Appearance / Colour	Clear liquid
Shelf life	12 Months from date of manufacture
Storage conditions	Store in dry cool conditions off ground out of direct sunlight
Specific gravity	1.0 kg/L
Consumption	Approximately 6-10m ² /L (depending upon surface porosity and site conditions)
Application Time	Allow Davco [®] Sanitized Tile & Grout Sealer to dry for 24 hours prior to re-turning to service

BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

IMPORTANT CONSIDERATIONS

- Test product in an inconspicuous area first
- Do not flood the floor with Davco® Sanitized Tile & Grout Sealer. Apply only in small sections and clean up the area before moving on
- Do not allow excess sealer to dry on the surface of the tiles as it will leave a white residue
- For other uses not mentioned in these instructions, please contact Sika Australia

ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety related data.

APPLICATION INSTRUCTIONS

SUBSTRATE PREPARATION

- Ensure grout joints and tile surfaces are thoroughly dry, clean, free from dirt, dust, grease, oil, wax and other contaminants.

APPLICATION

1. Apply using a sponge, brush or spray gun.
 2. Allow 5-10 minutes for the sealer to penetrate the surface, then wipe off excess with a damp sponge.
 3. Allow the sealer to cure for 24 hours prior to returning the area to service.
- Note: If only sealing grout joints of porous ceramic or terracotta tiles, ensure clean up method is pre-tested. It may be necessary to mask the joints

CLEANING OF TOOLS

Excess Davco® Sanitized Tile & Grout Sealer and tools can be cleaned up with Mineral Turpentine while the product is still wet / prior to drying.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the declared data for this product may vary from country to country. Please consult the local Product Data Sheet for the exact product data.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
